

FIVE MAJOR CIRCLES OF LATITUDE CRAFT

www.TheWiseNest.com

We had fun making this little craft as we were studying the circles of latitude.

This is how we did it: First, the kids just colored the picture of the Earth.

Then, they cut out and glued the labels on each circle.

Last, we used puffy paint to go over each line representing each circle of latitude.

After it dried out, each circle of latitude had a texture, something the kids could touch and feel and go over it with their hands as they recite the material back to me. As a bonus, it looks really cute to me, so we can hang it up in the school room to decorate our walls. :) If you don't have puffy paint, you can use pipe cleaners, yarn, or anything that has a texture and it is raised so you can get the same result.
